

# CURRENT LIST of MEDICAL LITERATURE

Vol. 15

December 3, 1948

No. 18

## Subject Groups According To Journals

- |  |   |
|--|---|
| 1. Allergy                             | * 26. Infectious Diseases                             |
| 2. Anatomy; Histology                  | * 27. Medicine.                                       |
| 3. Anesthesia                          | * 28. Military and Naval Medicine                     |
| 4. Anthropology                        | * 29. Miscellaneous                                   |
| 5. Aviation Medicine                   | 30. Musculoskeletal System                            |
| * 6. Bacteriology; Parasitology        | * 31. Neurology; Psychiatry                           |
| * 7. Biology                           | * 32. Nursing   |
| * 8. Cancer                            | * 33. Nutrition                                       |
| 9. Cardiovascular System               | * 34. Ophthalmology                                   |
| * 10. Chemistry; Physics               | * 35. Otorhinolaryngology; Phoniatry                  |
| * 11. Dentistry; Stomatology           | * 36. Pathology                                       |
| * 12. Dermatology                      | * 37. Pediatrics; Child Welfare                       |
| * 13. Diagnosis; Clinical Methods      | * 38. Pharmacology                                    |
| * 14. Digestive System                 | 39. Physiology  |
| 15. Endocrinology                      | * 40. Psychology                                      |
| 16. Forensic Medicine; Toxicology      | * 41. Public Health; Epidemiology                     |
| * 17. General                          | * 42. Radiology                                       |
| * 18. Genetics; Eugenics               | 43. Respiratory System                                |
| 19. Geriatrics                         | * 44. Surgery, General                                |
| * 20. Gynecology; Obstetrics           | * 45. Therapeutics                                    |
| 21. Hematology                         | * 46. Tropical Medicine                               |
| * 22. History; Bibliography; Biography | * 47. Tuberculosis                                    |
| * 23. Hospitals                        | * 48. Urology   |
| 24. Immunology; Serology               | * 49. Venereal Diseases (see also<br>12. Dermatology) |
| * 25. Industrial Medicine              | * 50. Veterinary Medicine                             |

THE ARMY MEDICAL LIBRARY  
Washington, D. C.

## THE ARMY MEDICAL LIBRARY

### PHOTODUPLICATION SERVICE

The purpose of photoduplication is to extend the services of the Library to those at a distance who cannot come in person to consult its collections. In the case of the Army Medical Library it provides an economical and efficient means of contributing more largely to the advancement of medicine and the public welfare.

In order that photoduplication may render the greatest possible aid to those engaged in medical research, the following policies in regard to its conduct will be observed:

1. The Library will lend without charge single microfilm copies of original articles published in medical periodicals not available locally. Such loan requests should be routed through libraries, governmental agencies, or research institutions. The microfilm, being a part of the duplicate collection of the Library may be used for ninety days and will be returned to the Library at the end of the loan period.
2. Requests for microfilms and photoprints for official business in the Department of Defense will be filled free of charge.
3. Microfilms will also be sold to those desiring to retain them, at a rate of 50 cents for each 50 pages or fraction thereof from a single article.
4. For the benefit of those not having the facilities to read microfilms, photoprint copies of separate articles from periodicals will be supplied at a charge of 50 cents for each 10 consecutive pages or fraction thereof from a single article.
5. Except when the order is accompanied by the written permission of the copyright owner, The Army Medical Library will not reproduce books protected by copyright, or entire periodical issues.

### INSTRUCTIONS

All requests, including those for free loans, must be submitted on Army Medical Library official order blanks (AML Form 48). A supply will be furnished on request.

All purchase orders must be accompanied by payment in cash or by check or money order made payable to the treasurer of the United States, or by Army Medical Library Coupons, which may be ordered in any quantity from the Library at 50 cents each.

Federal agencies will be billed periodically by Standard Form 1080 (Voucher).

Refunds for material the Library is unable to supply will be made by coupons unless cash refund is specifically requested.

---

The **CURRENT LIST OF MEDICAL LITERATURE** is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: \$3.00 per year (\$3.75 foreign); 10 cents per single copy. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

Published weekly by the **ARMY MEDICAL LIBRARY**, 7th Street & Independence Ave., S. W., Washington 25, D. C., as an intraservice publication of the Department of the Army. Lists all articles of medical interest contained in current journals received. Subject index provided monthly. Exchange invited.

## 6. Bacteriology; Parasitology

*J. Bact.*, Balt., 1948, 58: No. 4 (Oct.)

- SCHAUB, I. G., & HAUBER, F. D. A biochemical and serological study of a group of identical unidentifiable gram-negative bacilli from human sources. 379-85.
- BAKER, H., & BLOOM, W. L. Further studies on the Gram stain. 387-90.
- ALTURE-WERBER, E., & LOEWE, L. Prophylactic immunization against *Streptococcus sanguis*. 391-5.
- PEARSON, I. A., HAMMER, J. M. [et al.] Studies on the behavior of fungi in the presence of radioactive isotopes. 397-402.
- ANDERSON, T. F. The growth of T2 virus on ultraviolet-killed host cells. 403-10.
- STUART, C. A., GALTON, M. M., & MCGANN, V. Antigenic relationships of 764 *Paracolobactrum* intermedium cultures. 411-7.
- STUART, C. A., FEINBERG, R., & FEINBERG, R. An unusual type of O agglutination. 419-22.
- BRYSON, V. The effects of nitrogen mustard on *Escherichia coli*. 423-33.
- TABACHNICK, J., & VAUGHN, R. H. Characteristics of tartrate-fermenting species of *Clostridium*. 435-43.
- DIENES, L. The isolation of L type cultures from *Bacteroides* with the aid of penicillin and their reversion into the usual bacilli. 445-56.
- KELNER, A. Mutation in *Streptomyces flavescens* induced by X-rays and ultraviolet light. 457-65.
- EHRLICH, J., GOTTLIEB, D. [et al.] *Streptomyces venezuelae*, n. sp., the source of chloromycin. 467-77.
- TILLEY, F. W. The influence of subculture media on results obtained in disinfectant testing. 479-88.
- PAINE, T. F., JR., COLLINS, H. S., & FINLAND, M. Bacteriologic studies on aureomycin. 489-97.
- O'KANE, D. J., & GUNSALUS, I. C. Pyruvic acid metabolism; a factor required for oxidation by *Streptococcus faecalis*. 499-506.
- EVANS, F. L. A note on the susceptibility of *Haemophilus influenzae* type B to bacitracin. 507.
- HUDDLESON, I. F. A satisfactory medium for the isolation, cultivation, and maintenance of viability of vibrio fetus (bovine). 508.

*Mycologia*, Lanc., 1948, 40: No. 4 (July-Aug.)

- DELAMATER, E. D. Basic fuchsin as a nuclear stain for fungi. 423-9.
- DELAMATER, E. D. The nuclear cytology of *Blas-tomyces dermatitidis*. 430-44.
- SPARROW, F. K. Soil Phycomyces from Bikini, Eniwetok, Rongerik and Rongelap atolls. 445-53.
- SCHATZ, A., & HAZEN, E. L. The distribution of soil microorganisms antagonistic to fungi pathogenic for man. 461-77.
- MILLER, S. E. Laboratory diagnosis of mycotic diseases. 504.

## 7. Biology

*Arch. sc. biol.*, Bologna, 1948, 32: No. 4 (May-June)

- GHIRETTI, F. Studio comparativo dell'azione della colina e dell'acetilcolina sul cuore isolato dei molluschi gasteropodi e cefalopodi. 239-51.
- GHIRETTI, F. Rapporto fra temperatura e attività colinesterasica in animali omotermi e poikilotermi. 252-9.
- BORIANI, A. Intorno al meccanismo dell'azione sinergica svolta dalla sparteina nei confronti dell'adrenalina. 260-8.
- MARGARIA, R. Il tronco dell'encefalo come regolatore del sistema nervoso centrale. 269-77.
- TRABUCCHI, C. I mediatori chimici e la motilità delle piante. 278-90.
- MILLETTI, A. Osservazioni su alcuni problemi di meccanica funzionale delle fibre muscolari lisce. 291-304.

*Biol. Bull.*, 1948, 95: No. 2 (Oct.)

- HSU, W. S. Some observations on the Golgi material in the larval epidermal cells of *Drosophila melanogaster*. 163-8, incl. 2 pl.
- SMITH, R. I. The role of the sinus glands in retinal pigment migration in grapsoid crabs. 169-85.
- SCHARRER, B. The prothoracic glands of *Leuco-phaea maderae* (Orthoptera). 186-98.
- VON BRAND, T., NOLAN, M. O., & MANN, E. R. Observations on the respiration of *Australorbis glabratus* and some other aquatic snails. 199-213.
- ROGERS-TALBERT, R. The fungus *Lagenidium callinectes* Couch (1942) on eggs of the blue crab in Chesapeake Bay. 214-28.
- SCUDAMORE, H. H. Factors influencing molting and the sexual cycles in the crayfish. 229-37.
- HESTRIN, S. Action pattern of crystalline muscle phosphorylase. 238.
- KELLER, R. Vital staining in ultraviolet and in white light combined. 238.
- LAZAROW, A. The sulfhydryl metabolism of the beta cell and its relationship to the development of diabetes. 239.
- EICHEL, B., COOPERSTEIN, S. J., & WAINIO, W. W. A partial separation of the cytochromes of mammalian heart muscle. 239.
- ZCRZOLI, A. Alkaline phosphatase in demineralized mouse bones of different ages. 240.
- LEVY, M., & SLOBODANSKY, E. The order of amino acids in silk; an application of isotopic derivative technic. 240.
- AUGUSTINSON, K. B. On the specificity of cholinesterase. 241.
- NACHMANSON, D. Effect of anticholinesterases on conduction. 241.
- ROTHENBERG, M. A. The ion permeability of the giant axon of squid. 242.
- BLEISS, A. F. The extraction of purified squid visual purple. 242.
- JUNQUEIRA, L. C., FAJER, A. [et al.] Biochemical and histochemical observations on the sexual dimorphism of mouse submaxillary glands. 243.
- MILLER, J. A., JR. pH estimation in reconstituting pieces of *Tubularia* stems. 243.
- WHITING, P. W., & BLAUCH, B. M. The genetic block to free oviposition in the chalcidoid wasp *Melittobia* sp. C. 243.

- CORNMAN, I. Inhibition of sea urchin egg cleavage by a series of substituted carbamates. 244.
- MARSHAK, A. A nuclear precursor to ribo- and desoxyribonucleic acids. 244.
- SHANES, A. M. The effect of stabilizing and destabilizing agents in relation to the metabolic mechanism supporting the resting potential of nerve. 245.
- GREEN, J. W. The relative rate of penetration of the lower fatty acids into beef red cells. 245.
